WHEEL LOADERS

Designed to meet all the needs of our African customers, JCB's wheel loader range is made with performance, efficiency, ergonomics, serviceability, safety, reliability and comfort to the fore.

Performance-wise, a JCB wheel loader is all about big power, big torque, high power-to-weight ratio, powerful breakout forces and excellent traction.

As a result, each loading shovel we make is productive above all else. After all, a loading shovel is always in demand for many applications, so we offer a variety of configurations, options and attachments to tailor your front-end loader to any requirement, anywhere in Africa.

To keep uptime maximised and machines productive, JCB's Africa network comprises dealerships, expertise and parts backup.

All of which adds up to a job well done.
